Fueling Digital Excellence: Crafting Engaging User Journeys in E-Commerce

Professional Summary:

Energetic Front-End Developer with a passion for innovating in the dynamic realm of E-Commerce. Thriving in collaborative environments, I bring a wealth of experience to plan and organise impactful solutions to elevate user experiences. Currently contributing expertise to the success of Haverford Brands' 15 Shopify Stores.

Technical Proficiency:

- Proficient in HTML, CSS, JavaScript, and the intricate dance of front-end technologies.
- Navigating the Shopify Web Design platform with hands-on finesse.
- Weaving magic in Adobe Creative Cloud (Photoshop, Illustrator, Premier, etc.) with Intermediate to Advanced skills.
- Comfortably juggling in the Microsoft Office universe (Word, Excel, etc.).

Key Contributions:

- Design Maestro: Orchestrated front-end solutions, breathing new life into videos, themes, logos, and branding across diverse SHOPIFY websites.
- Strategic Visionary: Advised the management team on branding strategy, layout, and cutting-edge web design trends, ensuring a seamlessly captivating user experience.
- SEO Virtuoso: Executed website SEO strategies in dynamic collaboration with the Marketing Manager, navigating the digital landscape to boost search rankings and amplify online visibility.
- Identify and coordinate the resolution of accessibility issues on UAC's applications to ensure compliance with the appropriate accessibility standards. Making recommendations in line with the standards and guidelines for the Accessibility Committee to consider.
- Monitoring and accurately reporting the number of accessibility issues on UAC's applications and resolving or seeking assistance from others on time to meet the required accessibility standards. Produce accessibility best practice procedures and materials to share with UAC staff and external clients.
- Ensure relevant analytics and marketing platforms are coded correctly across all UAC applications. Including Google product implementation(Google Ads Manager, Google Tag Manager, Google Analytics, ADvendio(Salesforce) and Data Layer implementation).
- Conduct testing and analysis of template and website performance. This includes tracking and reporting on performance and implementing improvements. Assist with updates to the UAC website, including content updates, course descriptions and application portals as required.
- Building responsive HTML email templates for internal and external client campaigns and carrying out the appropriate level of testing to meet client requirements.
